

UGO-Omics website prototype for candidate and orthogroup exploration

A static JSON-powered platform links candidate modules, rhizome support, benchmark recovery, and downloadable resources

A Home page and platform overview

UGO-Omics

Home

Candidates

Benchmark

A cross-species atlas of underground organ gene modules

6 species

25,195 OGs

6 / 8 validated

6,924 supported

Species included

Evidence chain

B Candidate Browser

UGO-Omics

Home

Candidates

Benchmark

Search candidate, function, module...

OG0000652 → OG0000387

XTH / xyloglucan cell-wall remodeling

Lotus high: 5 | Benchmark: Cell wall

OG0001645 → OG0000665

bHLH-like transcriptional regulator

Ginger high: 3 | Benchmark: Dev TF

OG0002065 → OG0004093

MYB-like transcriptional regulator

Ginger high: 2 | Benchmark: Dev TF

C Benchmark and orthogroup browser

UGO-Omics

Home

Benchmark

Developmental TF

260 OGs

Hormone regulation

99 OGs

Stress resilience

84 OGs

Cell wall remodeling

40 OGs

Top orthogroups ranked by lotus/ginger support and benchmark evidence

D Downloadable data and reusable JSON layer

UGO-Omics
